### **Electric Vehicles International Establishes Michigan Office and Expands California Manufacturing Operations**

Stockton, CA – Electric Vehicles International (EVI) is happy to announce the opening of a new office in Southfield, Michigan. The Michigan office will primarily support EVI's national marketing and sales efforts.

EVI has been working on expanding the company's national reach. The opening of the Michigan office will allow EVI to better service our customers in the United States.

EVI has also increased manufacturing capabilities at our headquarters in Stockton, California. The California expansion includes an addition of 30,000 square feet to our plant as well as installation of new equipment. This expansion will allow EVI to maximize production of core electric vehicles.

"EVI is excited about establishing a Michigan office and sees this as the next crucial step in broadening our footprint. Michigan is the core of the automotive industry and we look forward to partnering with key companies as EVI grows," said Frank Jenkins, Vice President of Sales and Marketing. "Our plant improvements in California will help EVI modernize our electric vehicle manufacturing process, increase our production capacity and provide additional jobs."
